

About the book

This book has been designed to keep in mind the first year students studying Information Technology in Foundation Course under the four year undergraduate programme of University of Delhi. The book has tried to touch every aspect of Information Technology and tried to cover its influence in routine life of the people. It has covered some of the areas of study in brief and some in detail which can prove to be beneficial for students. The book not only provides the fundamental knowledge to the students but also motivates students to undertake project work in order to develop their IT skills through various project works and studies.
