

KIRORI MAL COLLEGE

IN COLLABORATION WITH
SPOKEN-TUTORIAL, IIT BOMBAY
PRESENTS

STUDENT DEVELOPMENT PROGRAMME ON

DATA ANALYSIS USING R

FROM: 25 JANUARY - 31 JANUARY, 2021

ABOUT THE COURSE:

Kirori Mal College, in collaboration with Spoken-Tutorial, IIT Bombay is presenting a one week student development program on "DATA ANALYSIS USING R". R is a leading open source language used in industry and academia for data analysis. In the early 1990s, R was developed for statistical and numerical analysis of large data sets with beautiful graphics using ggplot2. It runs on a variety of UNIX platforms (and similar systems such as LINUX), Windows and macOS. Being simple, well-developed and effective programming language, R provides very flexible language, effective data handling and storage facility, extensive and integrated collection of tools and graphical facilities for data analysis and display. Due to its robust features and effective data handling facility major organizations and universities use R for data analysis. R can be used for simple calculations, matrix calculations, differential equations, optimization, statistical analysis, plotting graphs, etc. Also, it is useful to anybody who wishes to undertake extensive statistical computations and data visualization.
